**BEET**

Burpee’s Golden

Introduced in 1970 by Burpee Seed Co. Dual purpose beet for roots and greens. Roots are globe-shaped and bright orange, turning golden-yellow when cooked. Tender and mild even when large. Will not bleed like red beets. Sweet flavorful leaves. 50-55 days.

Instructions: Sow seeds outdoors as soon as soil can be worked in spring. Seeds will germinate in 5-10 days. Can be planted at two-week intervals for continuous harvests. All parts of the beet plant are edible.

Detroit Dark Red Beet

heirloom | 28 greens, 50 beets days to maturity
1/16 ounce | 3 rows - 6 ft | item: 2236

Detroit Dark Red: Perfectly round blood-red roots are sweet and smooth. Excellent, high-quality heirloom storage variety that has been around since 1892. Leaves are suitable for salad or braising too.

Planting Tips: The beet is a hardy biennial that can tolerate light frosts. Grows best at cooler temperatures and in light, loamy soils with good moisture and a pH above 6.0. Direct seed as soon as soil can be worked. Sow every three weeks through late summer.

Detroit Dark Red BEET

Great for canning and fresh eating, this variety is a good keeper, producing round, blood-red, 3”-diameter roots. This historic variety was introduced in 1892 by D.M. Ferry & Company. Original selections were made from the Early Blood Turnip beet by Mr. Reeves of Port Hope, Ontario, Canada. 60-65 days.

Beet

Touchstone Gold Beet

Touchstone Gold: Vibrant golden yellow flesh retains its color when cooked and is sweeter and more mild than red beets. Solid green tops are long and attractive, and quickly shade out weeds.

Planting Tips: The beet is a hardy biennial that can tolerate light frosts. Grows best at cooler temperatures and in light, loamy soils with good moisture and a pH above 6.0. Direct seed as soon as soil can be worked. Sow every three weeks through late summer.
