Mustard

**Mustard Organic**

**Dragon Tongue**

40 days. A sweet and jaw-dropping beauty with frilly, crinkled leaves. Vibrant green with purple veins and thick, white midribs. Full-flavored and succulent without being overly spicy.

1 gram $3.65

**Sowing Indoors** - Not recommended.

**Sowing Outdoors** - Direct sow after the danger of frost has passed. Mid-July and August sowings make for great fall harvests.

**Growing Tips** - Mustards are cool season crops that quickly bolt (go to seed) with the onset of summer heat. They are best grown in spring and fall. Successive sowings allow for continual harvests. Generally a very easy crop to grow.

**Fertilization Tips** - Minimal fertilization is necessary for adequate growth. Apply ½ cup of our complete fertilizer per 10 row feet to provide the nutrition necessary for optimum production.

**Harvesting Tips** - Harvest the outer leaves as desired. Under normal growing conditions, mustard will allow 2-5 cuttings before going to seed.

**Seed Specs** - Min. germ. standard: 85%. Usual seed life: 3 years.

Some varieties are suitable for winter gardening. See our winter catalog.

Please read our seed guarantee before opening this envelope.

VEGETABLE SEEDS

**Planting Your Vegetable Seeds**

Choose a site with rich soil and ample sunlight. If the dirt is damaged or poorly irrigated, augment the site with fertilizer and/or potting soil. If planting a small area, use a rake or hoe to work the ground. If working a larger site, a roto-tiller is recommended. Mix your seeds with sand and sprinkle them evenly in rows. Once sown, cover the seeds gently with any excess top soil and put them into place. Water regularly until harvest.

Adaptive Seeds
Pacific Northwest grown, open pollinated, and organic seed.

MUSTARD
Dragon Tongue / Ho Mi Z
Brassica juncea. Hands down the most beautiful red mustard for salad mix. The leaf color is green and purple and hard to describe. Very slow to bolt in spring it has the perfect balance of sweet and spicy flavors. Bred by Frank Morton of Wild Garden Seeds.
Lot: 01  Germ: 99%  Packed for 2019
