Onion

**Ruby Red**

**Planting Instructions**

Beautiful burgundy skin gives this onion its name, Ruby Red. A good storage onion, Ruby Red is a large, firm, red onion that lasts 5-6 months. A Long Day Onion with a medium-large sized globe. Crunchy and aromatic, plants are very reliable and heavy yielding.

Ruby Red is a Long Day onion, therefore it grows best in zones 6 and colder. Plant in late winter/early spring when bulbs can form with 14-16 hours of daylight. Start indoors and transplant 8-10 weeks later. Keep sunlight and moisture constant as a steady supply of both is needed.

**Onion Seeds (Long Day) - Ruby Red - Packet**

- Germination Rate: 90%
- Packed for: 2019

**VEGETABLE**

**Onion**

**Walla Walla**

Long day variety grows up to 2 lbs. and will store for 2-3 months.

SOW in average soil in full sun after danger of frost in spring. In frost-free areas, sow in fall. Sow thinly in rows 12” apart and cover with 1/4” of fine soil. Firm lightly and keep evenly moist. Seedlings emerge in 7-14 days. Thin to stand 5” apart when seedlings are 1-2” high.

ONION
Yellow of Parma

1347 - Yellow of Parma (Allium cepa)
Imported from Italy. A top quality late-maturing onion with golden globe-shaped bulbs weighing an average of 1 pound. One of the best for storage. Long-day type. 110 days from transplant.

Instructions: Sow seeds indoors in flats \( \frac{3}{4} \) deep and space 1" in all directions. Transplant outdoors as soon as soil can be worked in spring. Keep onions well weeded with shallow cultivation.

ONION
Cipolla di Rovato

\( \frac{1}{2} \) g \( \approx \) 100 seeds

Allium cepa. Yellow Storage. 110 days. Gorgeous golden onion originating in Italy with that classic flat / disc shape. Delicious all purpose onion with a mild flavor. Bulbs are from 2-3" across; smaller bulbs are nice, dense and good for pickling. Surprised us with its superior storage ability.

Lot: 01  Germ: 97%  Packed for 2019

ONION

Sow indoors in flats with good potting soil February to March. Transplant into the garden in April or May, when plants are at least the size of a pencil lead. Space 6" in rows that are 1’ apart. Onions benefit from frequent watering and shallow cultivation. Stop irrigation in August. Harvest when stem has shriveled and tipped over. To save seed, replant at least 20 onions in the second spring. Large, beautiful globe shaped flower stalks attract pollinators. Isolate from other onions by at least 1/2 mile.
