**Swiss Chard**

**Perpetual Swiss Chard**

50 days. Extremely resistant to bolting, so you can feast on dark green succulent leaves and white stalks all summer. West of the Cascades, it can become perennial and bear for several years. Grows to 20 inches the first year.

3 grams $2.95

Plant Swiss Chard as soon as the soil can be worked in spring ½” - 1” apart and in rows 3” apart. Thin seedlings to two to three inches apart, and use these thinned greens in a salad. Swiss Chard plants are tolerant to over-crowding so don't worry if they appear too close. Pick as soon as the leaves are large enough to harvest.
